

## Pastor Gabrielle's church includes 22 widows and 38 orphans.

Pastor Gabrielle is in his 60's and has experience in agriculture. Below, Armando explains why rotation is so important for a good harvest and improving soil quality for the following years. Next year he will arrange three parts in the 'machamba' for rotation. Pastor Gabrielle encourages two youths in his church to work with him in the garden, equipping them with practical farming skills and teaching them the FGW Biblical keys. He uses the harvest to gift to families of widows and orphans in his church.

(L) P Gabrielle with Ignacio, one of the youth in his church that he is equipping

Again, we praise God for an abundant FOM harvest on the farm this year, especially as we had a late start due to Cyclone Freddy. The harvest is delivered to Mountain of Praise Church each week for the 60-70 orphans. Vegetables are grown March - December. We continue to be thankful for our borehole and simple irrigation system.

Fruit

Leaf

Root

**We have provided fruit, pumpkins and maize for orphans in the rural church communities while supporting the churches to develop their own food production**
